

Solution for universities:

Educational eKuore Pro

The stethoscope that improves the learning process

Use cases

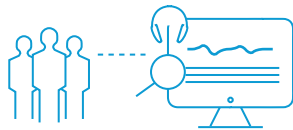

Teacher in the classroom

- Access to data base sounds of auscultations
- Displays the phonogram of each pathology
- It allows students to approach reality

Practical clinical visit

- Listen jointly (up to 6 people)
- Real patient recordings
- It improves understanding

Student from home

- Listen as many times as you want
- It improves academic performance

Virtual classroom

- Upload the audios to the virtual classroom
- Several audio examples from a same pathology

What does it do?

Records the auscultation

Displays the phonogram

Shares the auscultation easily

Listen jointly in real-time

Increases the volume
